DESKTOP PHONES

At Dstny we offer three different packages of desktop phones: **Low**, **Mid** and **High**.

LOW

SNOM D713

The distinctively designed D713 is the cost-effective gateway to the professional world of VoIP telephony. It is available in black and thus fits perfectly into any work environment. With the D713 you get the latest technology and the best voice quality at an unbeatable price.

The high-resolution color display enables the flexible label solution SmartLabel for the 4 freely programmable LED function buttons. The D713 is also equipped with a gigabit switch with PoE support.

- Including power supply and configuration
- Up to 6 SIP accounts
- Full TLS/SRTP support
- Gigabit switch
- 2.8-inch color screen

MID

SNOM D735

The Snom D735 is a compact all-round machine and is perfect for all possible uses thanks to its modern and smart functions, as well as the timeless design and color variants. The new, optimized firmware allows each user to transfer their calls with the touch of a button, initiate conference calls or temporarily turn off the phone. The high-resolution 2.7" color screen is surrounded by 8 multi-colored function keys that you can label yourself. The SNOM D735 also has a built-in motion sensor.

- Including power supply and configuration
- High resolution color display
- 8 physical and 8 virtual dynamic buttons
- Built-in Gigabit switch

HIGH

SNOM D785

The Snom D785 is an elegant, timelessly designed desk phone that features a large, clear, high-resolution color display as well as a convenient second screen for dynamic hotkey management. It also has integrated Bluetooth for wireless connection of headsets. This IP phone has most of what you would expect from a modern high-end phone.

- Including power supply and configuration
- High resolution color screen
- 6 physical and 4 virtual dynamic buttons
- USB socket
- Bluetooth connection
- Built-in Gigabit switch
- Power via the network (PoE) or via power adapter (accessory)
